Achievement Program for Primary Schools

The Achievement Program supports primary schools to adopt a health promoting schools approach to enhance both health and educational outcomes through a whole school commitment to health and wellbeing.

There are eight health priority areas:
- Healthy eating and oral health
- Physical activity
- Sun protection
- Tobacco control
- Mental health and wellbeing
- Safe environments
- Sexual health and wellbeing
- Alcohol and other drug use

Great reasons to participate:
1. Healthy children learn better
2. Integrate existing work into a comprehensive health and wellbeing strategy for school improvement
3. Promote the health of the whole school
4. Receive guidelines, tools and support
5. Work in partnership
6. Select priorities and work at a pace that best suits the school
7. Be recognised

Ballarat Community Health is providing support to primary schools working through the Achievement Program.
